27

Subject: Improvement in technical quality of AIR broadcasts in the capital region of Delhi.

A meeting under the chairmanship of **Engineer-In-chief, AIR** was held on 27.10.2004 to discuss various aspects of improving technical quality of AIR broadcasts particularly in the capital region of Delhi

One of several aspects discussed was about certification of the programmes generated from BH, Delhi before their broadcasts. Certification is considered essential to ensure technical quality during recording and production of programmes. A circular was also issued by DG, AIR in this regard.

Engg heads of all AIR, stations in north zone and SgE, BH, Delhi in particular are requested to devote special attention. to ensure technical quality of programmes before they are broadcast by implementing the practice of certification of programmes by Engg wing without fail
